**Label:** Naked Tree Recordings

**Format:** CD / Download

“Rapidly becoming alt. rock heroes.”  
– **Classic Rock Magazine (online)**

After working their fans into a frenzy with the release of singles ***Cheese Sandwich*** and ***Twenty***, internationally diverse noisemakers, **Wayter**, are now ready to release their debut album - ***Feeding Time***. Having already been featured in **Classic Rock** (*Track of the Day* for “Cheese Sandwich”) and **Ian Camfield's XFM Rock Show**, band members **Eddie** (Vox / Guitar), **Oscar** (Drums / Vox), **Juan** (Guitar / Vox), and **Dan** (Bass) are excited to see just how high they can fly with their first LP.

The album kicks off with their first track, ***Cheese Sandwich***, leaving the listener with no misconceptions - it's going to be a fantastically noisy ride. **Wayter's** ability to engage in sonic experimentation is what they are becoming best known for, and why their fans keep coming back for more. One minute you can be listening to Eddie's melodious vocals backed by minimalist guitar and drums before the track explodes into a shrieking whirlwind of primal screams and distortion. With comparisons already being drawn between them and underground heavyweights such as **Slint** and **Fugazi**, it will come as no surprise that this is a band who have no problems pushing the boundaries of discord.

**Wayter** display a stunning degree of technical ability throughout this album, with huge sections of songs dedicated to stunning grunge laden guitar work, overdrive pedal set to create the maximum amount of distortion, while maintaining a strong backbone of melody. With tracks ranging from the extended cinematic soundscape of album closer "Lima", to the accomplished 60s-tinged psychedelia of second single ***Twenty***, this is an album best played loud, and in full.

***Feeding Time*** is released via **Naked Tree Recordings** on May 30<sup>th</sup> 2011.

- Wayter are available for interviews
