

## BIOGRAPHY

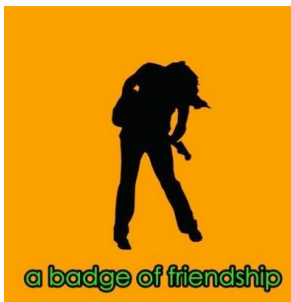

# EDIE SEDGWICK

**Edie Sedgwick** is the transgendered reincarnation of a vacuous Andy Warhol Superstar who died of a barbiturate overdose in 1971. A visionary artist who lay dormant in her host organism until his first epileptic seizure in 2001, Edie appeared at the dawn of the New Millennium to save the world by singing, writing, and producing video about celebrities. Armed with a video projector and an occasional backing band, Edie travels through the dark American night presenting auditory and visual art that honors the likes of Sissy Spacek, Martin Sheen, and other celebrity co-conspirators.

If smarter, edgier, more ridiculous, more serious, more compelling art has been made, is being made, or will ever be made, Edie is not aware of it; her latest album, *Things Are Getting Sinister and Sinisterer*, was released by Washington, D.C.'s **Dischord Records** in 2008.
